

PERSONAL PROJECTS

Custom C++ Game Engine | C++ | DirectX 11 **Aug 2024 - Present**

- Developing a custom game engine with a DirectX-11 rendering pipeline supporting 2D and 3D rendering.
- Using the game engine for several projects including a VR level editor and a 3D tower defense game.

ArchiLeap: VR Platformer with an In-game Level Editor | Custom C++ Game Engine **Aug 2024 - Present**

- Integrated OpenXR with my custom C++ game engine to support development of VR games.
- Developing a first-person Virtual Reality (VR) platformer with an in-game level editor.
- Implementing a level editor for Entity creation, translation, cloning, rotation and scaling using intuitive VR controls.

Custom JavaScript Game Engine | JavaScript | WebGL **Jan 2025 - Present**

- Developing a custom game engine with a WebGL rendering pipeline supporting 2D and 3D rendering.
- Using the game engine for projects including a 3D demo scene and a top-down 2D game.

ReyTD | Custom C++ Game Engine **May 2024 - Jul 2024**

- Developed a complete 3D tower defense game with 9 enemy types, 5 tower types and 6 levels.
- Created data-driven architecture to add new maps, environments, tower types, enemy types and levels.
- Implemented an event-driven UI system for the game with support for buttons and sliders.
- Implemented CPU-driven billboarded particles for wind simulated using Perlin noise.

SimpleMiner | Custom C++ Game Engine **May 2024 - Jul 2024**

- Developed a voxel-based infinite, deterministic world generation system.
- Added support for lighting using influence maps, glowstone flickering, day-night cycles and fog.
- Created rivers and biomes including deserts, oceans, frozen water bodies and forests using Perlin noise.
- Added VR support using OpenXR.

Doomenstein | Custom C++ Game Engine **Jan 2024 - May 2024**

- Developed a first-person shooter with billboarded 8-facing sprites and directional lighting.
- Implemented 3D model loading and shadow maps and added VR support using OpenXR.

SHIPPED TITLES

Imvi: Echoes of Harmony | Unreal Engine 5 | Lead Programmer | [Steam](#) **Jul 2024 - Dec 2024**

- Worked in a team of 23 developers including programmers, producers, level designers and artists.
- Contributed to milestone delivery documents, task planning and stakeholder presentations.
- Assisted programmers with math and code.
- Contributed to UI development using the Advanced Menu System.

Fastival | Unreal Engine 5 | Programmer | [Steam](#) **Jan 2024 - May 2024**

- Worked as the sole support programmer for most of the development.
- Set up daily builds, enforced perforce practices, fixed bugs and assisted programmers where necessary.
- Implemented the multiplayer system and contributed to the input system and menu UI.

EXPERIENCE

Hearty Adventures in Food and Play Lab | Research Intern **Melbourne** **Mar 2023 - Jul 2023**

- Developed a smartphone game designed to encourage real-world activities that support human gut health.
- Contributed to the design of the app in accordance with the research goals.

Twilio | Software Engineer 1 **Bengaluru** **Aug 2022 - Feb 2023**

- Worked in the Auth team on the Role-Based Access Control (RBAC) platform.
- Contributed to an internal tool and API endpoints that can be integrated with other Twilio products.

MIT Media Lab, Fluid Interfaces | Research Intern **Cambridge** **Jan 2022 - Jul 2022**

- Worked on the KALM project for anxiety management using Affective Brain-Computer Interfaces.
- Designed and developed a neurofeedback training protocol using electroencephalography.

Exertion Games Lab | Research Intern **Melbourne** **Jul 2021 - Dec 2021**

- Explored Electrical Muscle Stimulation (EMS) for novel interactions between users and systems.
- Designed social bodily games using EMS to study shared agency between multiple users and the EMS system.

Twilio | Software Engineering Intern **Bengaluru** **Jun 2021 - Jul 2021**

- Contributed to the Role-Based Access Control (RBAC) platform using the vaadin framework.
- Developed API endpoints for the access manager service (XMS).

EDUCATION

Southern Methodist University, Guildhall

Aug 2023 - Present

Master of Interactive Technology, Software Development

Birla Institute of Technology and Science, Pilani

Aug 2017 – Jul 2022

Master of Science, Physics

Bachelor of Technology, Computer Science

PUBLICATIONS

Shared Bodily Fusion: Leveraging Inter-Body Electrical Muscle Stimulation for **DIS 2024**

Social Play | [ACM Digital Library](#)

Go-Go Biome: Evaluation of a Casual Game for Gut Health Engagement and **CHI 2024**

Reflection | [ACM Digital Library](#) | [YouTube](#)
